Clean stage and identification quality: descriptive single-seed evidence

The -0.1 pp line applies only to clean As - matched NoAs. F1 and worst RX are retained even when accuracy changes are small.
Fixed seed 2026092701; n = 1. No SD or CI. Total E30 = 20 + 10, reset cosine10; 6L forwards, L scale 1.25; 0 extra mechanism NN.
Source eligibility: FAIL; fixed recipe closed, no E50. Formal readout is descriptive; no repeated gain is established.
