Paired effects: separate As gains from NoAs control changes

A compares As with its own matched NoAs. B and C isolate the input change. Interaction alone does not establish a clean or satellite gain.
Fixed seed 2026092701; n = 1. No SD or CI. Total E30 = 20 + 10, reset cosine10; 6L forwards, L scale 1.25; 0 extra mechanism NN.
Source eligibility: FAIL; fixed recipe closed, no E50. Formal readout is descriptive; no repeated gain is established.
